INTRODUCTION

As a full stack web developer, I bring a wealth of experience to the table, particularly in JavaScript technologies such as ReactJS. In addition, I have a solid background in Java, which I have utilized to develop API's and handle backend logic with Spring Boot.

I got started in my career in engineering while studying computing at Manchester Metropolitan University. Since then, I have continued to grow my skillset as a consultant, working in various projects.

I am highly motivated, always looking for new opportunities to take on challenging problems and learn from others in the field. My passion for front-end development makes me particularly interested in exploring job opportunities in this area.

With a strong commitment to continuous learning and a flexible approach, I am confident that I can adapt to any position and make meaningful contributions to any team.

EDUCATION

MSc COMPUTING – First Class (Hons)

2018 – 2019

Manchester Metropolitan University

On the course I studied the subjects of: Advanced Object Oriented Programming, Web Development, Information Systems, Database Implementation, Oracle, Enterprise Programming, Distributed Computing, Design Patterns, Data Management and Machine Learning.

BSc (Hons) Web Development – First Class (Hons)

2015 – 2018

Manchester Metropolitan University

Studied the subjects such as: Website Design, User Experience Design, Media Making, Website development and Web Programming.

2013 – 2015

St Mary's College

GCSE – 3 B, 6 C including Maths (B) and English (C)

2009 – 2013

Mount Carmel High School

EXPERIENCE

Full Stack Web Developer @ TH-EY

2018 – Present

As a full-stack developer, I have had the opportunity to work on a diverse range of products and projects. These have included implementing a jobs board, a social shopping marketplace, and a hybrid working management platform. My responsibilities have included setting up the projects' AWS infrastructure, developing the front-end user interfaces using technologies such as ReactJS and NextJS, as well as working on the back-end with Java Spring Boot. Additionally, I have experience working with other technologies such as WordPress, Shopify, Laravel, Angular and more.

Freelance web design and development

Prior 2018

I gained a wealth of experience in creating and maintaining websites for a variety of clients. I developed a strong understanding of various technologies and got a good grasp of how to use these technologies to build responsive and user-friendly websites. I've also honed my problem-solving and critical thinking skills, as I've had to troubleshoot and debug various issues that have arisen during development. Additionally, I gained valuable experience working independently and managing my own time, which has helped me become a highly productive and efficient worker.

SKILLS

- ReactJS with frameworks such as NextJS
- Building reusable and responsive React components using styled-components, Storybook
- Experience with GraphQL, Apollo, React-query
- Unit testing utilizing Jest, React testing library
- Experience with Angular
- JavaScript (ES6/ES7) with TypeScript
- Module bundling with Webpack
- Experience with SCSS, BEM and CSS3
- Semantically correct, SEO friendly, accessible page structures with HTML5
- GIT Repository experience in GitHub, GitLab and BitBucket
- Agile working methods with Atlassian stack (Jira, Confluence and Slack)
- Figma + UX/UI and wireframing and design experience
