PROFILE

Senior Full-Stack Developer with 8+ years delivering production web applications across legal tech (AI-powered patent search), compliance SaaS, hybrid workplace management, HR/recruitment, and fundraising.

Frontend-leaning with deep React, TypeScript, and Next.js expertise, backed by hands-on Node.js / Express, GraphQL, Java / Spring Boot, and AWS. Eight years as a senior engineer at THEY.dev, a UK software consultancy, embedded with client teams of varied size and maturity rather than a single in-house codebase.

EXPERIENCE

Senior Full-Stack Developer — THEY.dev · 2018 – Present

UK software consultancy delivering custom web and mobile applications for SMEs, startups, and scale-ups

Embedded as a senior engineer with multiple client teams across the agency's portfolio — from 2-person MVPs through to scale-up products with 13+ engineers post-funding. Owns architecture decisions, builds reusable component systems, and contributes across the stack from AWS infrastructure through to UI.

- Designed a multi-tenant layered feature flag system (global → organisation → user override) with a matching Prisma schema and TypeScript service layer
- Scaled Apollo Client cache invalidation patterns across a large React/TypeScript codebase, reducing stale-data bugs and redundant network traffic
- Built a pre-merge git hook system to enforce branch hygiene and prevent broken feature branches from reaching staging
- Built reusable React components and APIs for high-volume data workloads (10,000+ row result sets) with performant data preparation pipelines
- Mentored 3 junior developers across 4 client engagements and reviewed client-facing architecture proposals

SELECTED PROJECTS

AI-Powered Patent Search Platform · Senior Full-Stack Developer

React · TypeScript · Node.js / Express · GraphQL · PostgreSQL · MongoDB

Full-stack development on a patent research platform for IP professionals, handling large-scale result sets (10,000+ patents per query) with AI-supported search and AI-generated reports.

- Built the analytics module end-to-end — performant data preparation pipelines and interactive graph visualisations for large patent datasets
- Developed reusable, performant React components spanning complex forms, data tables, and visualisations
- Implemented report export functionality (notes, highlights, structured reports) with support for large result sets
- Contributed to AI-supported search and automated report generation features on both the client and server layers

KYC & AML Compliance SaaS Platform · Senior / Lead Full-Stack Developer

React · TypeScript · Stripe · AWS

Compliance SaaS platform digitising a manual KYC process into structured smart forms, automated risk scoring, and audit-ready documentation, backed by Stripe-powered subscriptions.

- Led development on specific workstreams end-to-end, from architecture through delivery
- Built dynamic assessment forms with conditional logic, validation, and automated risk scoring
- Integrated Stripe for subscription billing and lifecycle management

Common Surface — Hybrid Work Scheduling Platform · *Senior Full-Stack Developer*

React · Next.js · Node.js · TypeScript · Java / Spring Boot · MySQL · AWS

Hybrid work scheduling for a London-based startup, scaled from a 2-person MVP to a 13-person team following VC investment. Covers office planning, calendar sync, HR integrations, and Slack.

- Full-stack contributions across UI, APIs, and AWS infrastructure through the MVP-to-scale transition
- Built scheduling, calendar sync, and third-party HR integrations used across client organisations

Onboard — HR Platform with Voice-Based Applications · *Full-Stack Developer*

React · TypeScript · Java / Spring · Web Audio API · AWS

HR platform enabling candidates to apply for jobs via voice recordings, bridging the gap between the application and interview stages.

- Built voice-based application flows on the React client using the Web Audio API
- Delivered full-stack features across both candidate and recruiter sides of the product

Localgiving — Fundraising Platform · *Senior Frontend Consultant*

Next.js · React · TypeScript

Frontend consultancy on a long-running UK fundraising platform connecting donors with local causes.

- Senior frontend development and consultancy on user-facing features and code quality
- Contributed to AI-supported grant finding and application flow for fundraisers

EDUCATION

MSc Computing — First Class (Hons)2018 – 2019

Manchester Metropolitan University · Advanced OOP, Web Development, Database Implementation, Distributed Computing, Design Patterns, Machine Learning

BSc (Hons) Web Development — First Class (Hons)2015 – 2018

Manchester Metropolitan University · Web Design, User Experience, Web Programming, Media Making

SKILLS

Languages & frameworks — TypeScript, JavaScript (ES6+), React, Next.js (App Router & React Server Components), Node.js, Express.js, Angular, Java, Spring Boot

API & data — GraphQL, Apollo Client, React Query, REST, PostgreSQL, MongoDB, MySQL, Prisma, Zustand

Frontend craft — Reusable component systems, styled-components, SCSS / BEM, semantic & accessible HTML5, Storybook, Figma, responsive design, shadcn/ui, HeroUI, Framer Motion

Testing & quality — Jest, React Testing Library, git hooks, code review, performance optimisation

Infrastructure & tooling — AWS, Webpack, GitHub / GitLab / BitBucket, CI/CD workflows, Vite

Ways of working — Agile, Jira, Confluence, Slack, client-embedded delivery, mentoring

CERTIFICATES

credly.com/users/dawid/badges

AWS — Certified cloud practitioner
